ABOUT ME

MERN stack developer and Computer Software Engineering student with a strong interest in building modern, responsive web applications. Board Member and Project Manager at the youth association Plus Ultra, where I previously served as IT Coordinator, combining my technical background with team leadership and project coordination. Alongside development, I have experience tutoring students in C++, which helped me build strong communication skills and a passion for helping others learn. I enjoy working in collaborative environments, taking responsibility, and continuously expanding my knowledge of new technologies. Always eager to take on new challenges and deliver practical, high-quality solutions.

WORK EXPERIENCE

Udruženje za razvoj i podršku mladih Plus Ultra – Sarajevo

Project Manager

[01/06/2026 – Current]

- Managed the 7th edition of the Free Programming School, a flagship educational program for high school students.
- Revitalized the program after declining interest in the previous edition by introducing two new tracks: Web Development and Python.
- Built and led a 5-person team covering PR, HR, IT, Education, and Design, defining responsibilities and coordinating daily work.
- Designed the full curriculum from scratch, tailored to beginner high school students. Web Development students build their own website and defend it at the final certificate ceremony, while the Python track follows its own project-based path.
- Planned and ran the participant selection process: created application forms, published open calls, and carried out candidate selection.
- Developed the school's visual identity and adapted all communication channels, including Instagram (https://www.instagram.com/plusultra_sp/), to reach the target audience of high school students.

Udruženje za razvoj i podršku mladih Plus Ultra – Sarajevo, Bosnia and Herzegovina

Volunteer - IT team

[01/05/2024 – Current]

Worked on the development of a full-stack web application using the MERN stack. Primarily focused on building the frontend with React and Tailwind CSS to create a modern, responsive user interface. Utilized various additional libraries to enhance styling and functionality. Developed backend services using Node.js and Express, with MySQL as the relational database. Gained hands-on experience in full-stack architecture, component-based design, and RESTful API integration.

Udruženje za razvoj i podršku mladih Plus Ultra – Sarajevo, Bosnia and Herzegovina

Mentor for MERN stack, JavaScript, and Tailwind CSS

[01/03/2025 – 01/09/2025]

- Mentor and train members of the association in MERN stack technologies (MongoDB, Express.js, React, Node.js), JavaScript, and Tailwind CSS.
- Conduct practical workshops and coding sessions for web application development.
- Hold regular consultations and individual sessions for support and problem-solving.
- Prepare educational materials and provide technical assistance to learners.
- Encourage the development of practical skills and independent problem-solving among young developers.

Udruženje za razvoj i podršku mladih Plus Ultra – Sarajevo, Bosnia and Herzegovina

Tutor

[01/09/2024 – 20/05/2025]

Worked as a C++ programming tutor at the PlusUltra "Škola programiranja". Conducted practical exercises for students of various knowledge levels. Focused on explaining both fundamental and advanced C++ concepts, including working with variables, loops, arrays, matrices, vectors, functions, pointers, object-oriented programming, and file handling. Actively assisted students in solving problems, developing logical thinking, and preparing for entrance exams.

– Donji Vakuf, Bosnia and Herzegovina

FREELANCER

[01/02/2022 – Current]

Independent Projects / Clients:

- Developed various web applications with a strong focus on the frontend using JavaScript, React, Tailwind CSS, and other modern technologies.
- Collaborated with clients on designing and implementing responsive user interfaces optimized for multiple devices.
- Implemented interactive features and UI components according to project requirements.
- Utilized version control tools (Git) and followed best software development practices.
- Adapted designs and functionality based on user feedback and testing.

EDUCATION AND TRAINING

Bachelor of Science in Computer Science

University FINRA Tuzla [06/2025 – Current]

City: Tuzla | **Country:** Bosnia and Herzegovina | **Website:** https://finra.edu.ba/ | **Field(s) of study:** Information and Communication Technologies: ● Software and applications development and analysis

Electrical technician of information technologies

MJEŠOVITA SREDNJA ŠKOLA DONJI VAKUF [04/09/2021 – 09/05/2025]

City: Donji Vakuf | **Country:** Bosnia and Herzegovina

From volunteer to project manager
